

I have been keeping up to date about Clear Channel Radio Broadcasting's support of programing that actually suggested violating motor vehicle laws and "run down" bicyclists on the streets. Other than the act of murder/violence, I think this is a gross misuse of our Public airwaves and this station should be given the "death sentence" and removed off the air. We should expect a little "wackey" or off center views occasionally, but this is so far over the line of responsibility that some other company should be given a chance of better broadcasting. Thank you, Emery Cole
